PROJECTS

Online Event Management System.- Events Buffer

Feb - 2021

Events Buffer is an online Website which helps the users to find information about all events at one place. It also gives the flexibility to the users to register to any event that they are interested in. If any Events will be added to the application, then the form controls will also be updated.

Sign Language and Hand Gesture Recognition.

March 2021 - May 2022

This project is a tool for the deaf and dumb society which helps them to communicate with the people who do not understand the sign language. This tool converts the hand gestures in to sentences and audio so that the person next could understand what the person is trying to say and could help him in some way. This project is mainly designed for the people who are deaf or dumb but know sign language to keep their word through this tool
